

Freshwater fishes of North America removed from the list of extinct fishes; reasons for removal from list and supporting citations are provided; sp. = undescribed species.

| Family, <i>Scientific Name</i> | Reason Dropped from Extinct List |
|---------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Petromyzontidae | Lampreys |
| <i>Entosphenus minima</i> | Extant; rediscovered in Miller Creek in 1996 and in several other locations above upper Klamath Lake, including Crooked Creek, Long Creek, and South Fork Sprague River (Lorion <i>et al.</i> 2000). |
| Cyprinidae | Minnnows |
| <i>Gila</i> sp. "carpa gorda de Parras" | Extant; taxon rediscovered in 2010 from a spring adjacent to site it was formerly known from in Parras, Mexico (personal communication courtesy of Dean Hendrickson, University of Texas at Austin). |
| <i>Notropis amecae</i> | Extant; see López-López and Paulo-Maya (2001) |
| <i>Siphateles bicolor isolata</i> | Extant in Independence Valley, NV; see Rissler <i>et al.</i> (2001). |
| Salmonidae | Trouts and Salmons |
| <i>Coregonus alpenae</i> | Invalid taxon synonymized: see Lyons <i>et al.</i> (2000). |
| Goodeidae | Goodeids |
| <i>Allotoca maculata</i> | Extant; new populations detected in El Palo Verde and in ditches and pools around San Marcos in late 1990s. All habitats are part of the endorheic Magdalena basin. |
| <i>Ameca splendens</i> | Extant; López-López and Paulo-Maya (2001); Domínguez-Domínguez <i>et al.</i> (2005) |
| Cyprinodontidae | Pupfishes |
| <i>Cyprinodon</i> sp., "Perritos De Sandia" | Taxonomic revision; represents four described, extinct taxa within the interior basin of Sandia, Nuevo León, Mexico (Contreras-Balderas and Lozano-Vilano 1996). |
